## Acid Neutralizer (in/out Valve with Bypass) OR: Acid Filter (Control Valve with Bypass.)

### Increase of:

Low pH Level (Acidic Water).  
Prevent the Leaching of Metals.

### Benefits:

Low Maintenance.  
Prevents Leaching of Metals including  
Lead, Copper (Blue/Green Stains).

### Maintenance

When the pH level is low, the Calcite media sacrifices itself. The media must be topped up annually to prevent corrosion and leaching of metals. This system will add water hardness.

Clack Filter Valve requires annual service to maintain the warranty.

### Warranty

Our systems are backed by a 5-Year Manufacturers Warranty on the Control Valve or In/Out Valve, 10-Year Warranty on the Filter Vessel. 1-Year Parts & Labour Warranty.
